PROFESSIONAL SUMMARY

Software Engineer with 3 years of experience developing web applications and backend services. Strong experience with Python, REST APIs, Docker, and databases. Interested in applying software engineering skills to machine learning applications.

TECHNICAL SKILLS

Programming:

- Python**
- JavaScript**
- TypeScript**
- SQL**

Backend:

- FastAPI**
- Flask**
- REST APIs**
- PostgreSQL**

Software Engineering:

- Git**
- Docker**
- Linux**
- CI/CD**
- Unit Testing**

Other:

- pandas**
- NumPy**
- Basic scikit-learn**

PROFESSIONAL EXPERIENCE

Software Engineer

WebTech Solutions

2023 - Present

- Developed backend services using Python and FastAPI.**
- Designed and maintained REST APIs.**
- Worked with PostgreSQL databases and optimized SQL queries.**
- Containerized applications using Docker.**
- Implemented automated tests for backend services.**

- Used Git and CI/CD pipelines for software development.
- Worked with frontend developers to integrate backend APIs.

Junior Software Engineer

CodeWorks

2022 - 2023

- Developed web applications using Python and Flask.
- Implemented API endpoints and database integrations.
- Fixed production issues and improved application performance.
- Participated in code reviews and software development activities.

EDUCATION

BSc in Software Engineering

SLIIT

2022

PROJECTS

Sales Prediction Prototype

- Used pandas to prepare a small sales dataset.
- Implemented a basic linear regression model using scikit-learn.
- Created a Python script to generate predictions.
- Exposed the prediction script through a simple API.
