

Name: Daniel Perera
Location: Colombo, Sri Lanka
Email: daniel.perera@example.com

Professional Summary

Backend software engineer with 3 years of experience building REST APIs and scalable web applications using Python. Experienced in FastAPI, PostgreSQL, Docker, Git, and automated testing. Strong background in backend architecture and database-driven applications.

Skills

- Python
- FastAPI
- Flask
- PostgreSQL
- REST APIs
- Docker
- Git
- Redis
- SQL
- Pytest
- Linux
- CI/CD

Experience

Backend Engineer | TechFlow Solutions
2023 - Present

- Developed REST APIs using Python and FastAPI.
- Designed PostgreSQL database schemas and optimized SQL queries.
- Containerized backend services using Docker.
- Implemented automated tests using Pytest.
- Improved API response times by optimizing database queries.
- Worked with frontend developers to integrate REST APIs.
- Used Git and CI/CD pipelines for development and deployment.

Junior Software Engineer | CodeBridge
2022 - 2023

- Developed Python backend services.
- Maintained Flask applications.
- Fixed production bugs and implemented new API endpoints.
- Worked with PostgreSQL and Redis.

Education

BSc in Computer Science
University of Colombo
2022
