

Sarah Fernando

Kandy, Sri Lanka

sarah.fernando@example.com

PROFESSIONAL SUMMARY

Data Scientist with 2 years of experience working with data analysis, statistical modeling, and machine learning. Experienced in Python, pandas, NumPy, and scikit-learn. Interested in developing production machine learning systems and expanding experience in deep learning and ML deployment.

TECHNICAL SKILLS

Programming:

- Python**
- SQL**

Data Science:

- pandas**
- NumPy**
- Data Analysis**
- Exploratory Data Analysis**
- Statistics**
- Feature Engineering**

Machine Learning:

- scikit-learn**
- Classification**
- Regression**
- Clustering**
- Model Evaluation**

Other:

- Git**
- Jupyter**
- Tableau**
- Basic Docker**

PROFESSIONAL EXPERIENCE

Data Scientist

Insight Analytics

2024 - Present

- Analyzed customer and sales datasets using Python and pandas.**
- Developed classification and regression models using scikit-learn.**
- Performed feature engineering and data preprocessing.**

- Evaluated models using accuracy, precision, recall, and F1-score.
- Conducted exploratory data analysis to identify patterns in datasets.
- Created dashboards and reports for business stakeholders.
- Used SQL to extract and transform data from relational databases.
- Collaborated with analysts and business teams to define data requirements.

Junior Data Analyst

DataWorks

2023 - 2024

- Cleaned and transformed datasets using Python and pandas.
- Performed statistical analysis on customer datasets.
- Created automated reports using Python.
- Used SQL to retrieve data from databases.
- Assisted data scientists with machine learning experiments.

EDUCATION

BSc in Data Science

University of Moratuwa

2023

PROJECTS

Customer Churn Prediction

- Built a customer churn prediction model using scikit-learn.
- Performed feature engineering and data preprocessing.
- Compared logistic regression, random forest, and gradient boosting models.
- Evaluated models using cross-validation and F1-score.
